Experience Summary

Results-driven Software Engineer with 3 years of experience in developing, enhancing, and maintaining mission-critical financial applications. Skilled in Java, SQL, AWS, EDI, and IBM Sterling B2B Integrator, with expertise in application modernization, system integration, and production support. Proven ability to work closely with stakeholders, business analysts, and backend teams to deliver scalable, reliable, and business-focused solutions while driving operational efficiency and continuous improvement.

Experience

Type of Industry: Banking and Financial Services

Project Description: Developed and maintained Java microservices for the Rewards Earn platform, managing CI/CD pipelines to ensure timely and robust feature delivery. Supported production by debugging issues and executing platform migrations, including JDK upgrades.

Client: Barclays

Role/Title: Software Developer

Project Duration: June 2024 - Aug 2025

Responsibilities:

- Develop and maintain Java-based microservices for Rewards Earn functionalities.
- Manage configurations and support CI/CD-based deployments.
- Maintain code quality through testing and peer reviews.
- Support production by monitoring, debugging, and resolving issues.
- Perform version upgrades and support platform migrations such as JDK updates.
- Analyze business logic and implement enhancements based on catalog and rewards rules.

Operating Systems: Windows 11

Software Java 8

/Languages:

Special Tools: IntelliJ IDEA, Postman, Oracle SQL, OpenShift, Bitbucket, Jenkins, Jira, Git

Type of Industry: Banking and Financial Services

Project Description: Experienced in IBM Sterling Integrator production support, B2B integrations, EDI transaction monitoring, file transfer management, incident handling, root cause analysis (RCA), stakeholder communication, and service availability management for the Farmers Insurance account.

Client: Farmers Insurance

Role/Title: Software Product Expert -1

Project Duration: Oct 2025 – Present

Responsibilities:

- Managed IBM Sterling Integrator (SI) production environments, ensuring seamless B2B/EDI transaction processing, system availability, and operational stability.
- Performed proactive monitoring, incident troubleshooting, and Root Cause Analysis (RCA) to resolve file transfer failures and integration issues.
- Collaborated with cross-functional teams, trading partners, and business stakeholders to address connectivity, data exchange, and application support challenges.
- Led incident management activities, providing timely status updates, stakeholder communications, and escalation support to meet SLA requirements.
- Enhanced production support efficiency through continuous monitoring, problem resolution, and preventive actions, minimizing business impact and downtime.

Operating Systems: Windows 11

Software / EDI

Languages:

Special Tools: IBM Sterling Integrator, SFG,
FileZilla, ServiceNow, DB Visualizer

Key Skills

Functional: Excellent Communication and Interpretation skills, employee engagement, internal communications expertise, Email campaigns

Technical: Strong knowledge and practice in Object Oriented Programming Language and have strong knowledge in below:
